

## What do we offer?

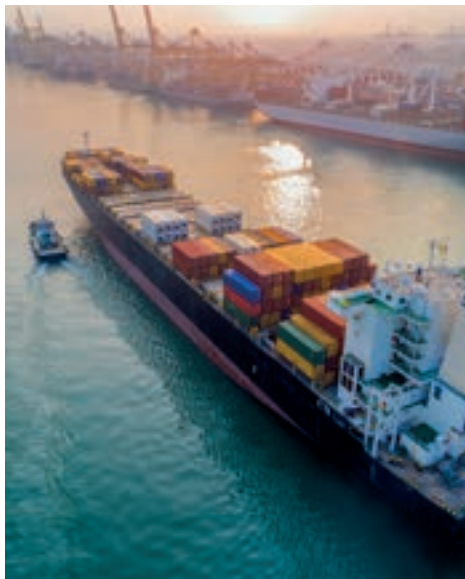

### International Forwarding

We offer world-class international forwarding services, and domestic transportation, fulfilling our customer's expectations by delivering their freight and offering multi-modal transport options – reliable, and on time.

### Trade Facilitation and After-Sales Service

We help customers develop trade and after-sales service, offering a route to market, that facilitates the import and trading function of a local distributor and/or legal entity, providing the customer with full control of their business in complex regions (CIS and Asia). Additionally, we provide an answer to after-sales needs, including compliant free-of-charge warranty import exports, spare-part logistics, and local stock fulfillment.

### Secured Transportation of Theft Sensitive Goods

We have over 30 years of specialized knowledge in transporting high-value cargo by road and rail in Eastern Europe, Russia, and CIS. With our next-generation monitoring and security solution (IoT based), we provide the highest standards in secured transportation, reducing the dependency on human interaction while realizing significant cost savings.

### Warehousing and On-site Logistics

We have a regional network of warehouses in key locations in Russia, and Ukraine, as well as a bonded warehouse. Our experts can help

you with on-site logistics at your premises, simplify your logistics processes, reduce your costs and increase your performance and on-site safety.

### Project Logistics

We manage your complex global projects, tailor-made, with a clear scope and a dedicated team. We always strive for optimal solutions, for container or breakbulk shipments, heavy lift handling, or out-of-gauge services. Moreover, we take care of your door-to-door delivery of heavy machinery, rolling stock, and mining equipment. Dedicated chartering desk.

We enable our customers to stay focused on their core business by creating and managing innovative solutions that add value and solve their supply chain challenges in complex markets.

## Solutions Beyond Logistics

However far our customers aim to go, we are always right beside them. We envisage to see the world from their perspective and help them identify the best way of organizing their logistics activities. This results in tailor-made, unique solutions to fit our customer's profile, often going beyond pure logistics.

Reducing total go-to-market cost, creating long-term added value. In each activity, using the right resources. **That's our objective.** Because our creativity and flexibility have no boundaries.
